

## Analysis of the previous iteration

We got started with all the tasks we set out to get started with. We were two persons short due to sickness and one did not have the intention to participate in the course. We distributed the roles; the project manager role is going to alternate every two weeks, Sofia is test manager, Jimmy is technical manager, Andrew and Linda are requirement managers and are responsible for customer contact.

Andrew had his initial contact with the customer. Jimmy set up our Github repo, wrote a risk list and started with the architecture diagrams for the system. Sofia set up the wiki pages, started writing on the project plan and vision. Other tasks that were done can be found in the time report in iteration 0 and in the individual time reports.

It has been a slow but steady start and we are eager to get started with the project.

## Time report iteration 1

Name	Sum iteration	Time total in project
Andrew	15.5	21.5
Jimmy	15.75	24.75
Linda	20.75	20.75
Sofia	14.25	23.75

## Detailed time report iteration 1

Requirement	Task	Status	Estimate	Actual	Responsible
Tutor meeting	Present the work done during start-up week	Done	4	2	Group
Group meeting	Discuss iteration plan	Done	2	4	Group
Time report	Create for iteration 1	Done	4	3.75	Group
Iteration plan	Create for iteration 2	Started	4	0.25	Group
Customer meeting	Meeting concerning tech implementation	Done	4	3	Group
Vision	Start writing	Done	4	2	Andrew
Vision	Update	Done	0.5	0.5	Linda
Vision	Read updated vision	Done	0.25	0.25	Sofia
Product backlog	Start writing requirements	Done	4	4	Andrew
Product	Prioritize requirements	Done	5.5	6.25	Group

backlog	and add comments				
Product backlog	Update requirements and add missing ones	Done	1	1.5	Linda
Product backlog	See if requirements are testable	Started	2	0.25	Sofia
Project plan	Update	Done	3	2	Sofia
Project managing	Write list to make it clear what needs to be done before next group meeting	Done	1	1	Sofia
Group discussion	Discuss on Slack	Done	2.75	2.25	Group
Github wiki	Get info about Waffle.io	Done	2	0.5	Jimmy
Github wiki	Rename wikipages	Done	0.25	0.25	Sofia
Github wiki	Update home with correct links	Done	0.25	0.25	Jimmy
Risk list	Update	Done	3	1.5	Jimmy
Version control	Investigate and set up version control	Done	1.5	2.5	Jimmy
Version control	Investigate version control	Done	1	1	Andrew
Version control	Try out the version control work flow	Done	0.75	0.75	Sofia
BankID	Look up and write email to customer	Done	2	2	Sofia
SignalR POC	Initial check for suitability	Done	4	4	Andrew
Glossary	If needed, write down glossary for the project	Not started	1	–	Andrew
Test specification	Start writing tests for the high priority requirements	Not started	4	0	Sofia
Implementation	Investigate the projects tech	Done	3	3.25	Group
Implementation	Initialize client	Done	4	3.5	Jimmy
WebRTC POC	Start creating POC for video chat	Started	1	1	Jimmy
Documentation	Research update order of pages, catch up on documentation, discuss with group, update	Done	2	2	Linda

Lecture	Watch course introduction	Done	1.75	1.5	Linda
Project knowledge	Read through entire course page, requirements from RedRiver, repo	Done	2.5	2.5	Linda
Customer communication	Send e-mail to client RedRiver/Mattias regarding Mobile BankID	Done	0.5	0.5	Linda
Question document	Add document to repository with questions to client RedRiver, regarding requirements	Done	1	2	Linda
Question document	Add new questions	Done	2	2.75	Linda/Sofia
Post mortem	Read one post mortem from previous years	Done	2	1.5	Linda
		Sum	81.5	66.25	
		Time since previous iteration		25	
		Time total in the project		91.25	

## New risks

Any new risks should be written here.

## Goals for iteration 2

Requirement	Task	Status	Estimate	Actual	Responsible
Tutor meeting	Present the work done during iteration 1	Not started	4	–	Group
Group meeting	Discuss work done, the new iteration plan and distribute tasks	Not started	4	–	Group

Time report	Create for iteration 2	Not Started	4	–	Group
Iteration plan	Create for iteration 3	Not started	4	–	Group
Vision	Send to customer for signing	Not started	1	–	Andrew
Client questions	Send question document to customer	Not started	1	–	Andrew
Product backlog	See if requirements are testable	Not started	1.75	–	Sofia
Test specification	Start writing tests for the high priority requirements	Not started	8	–	Sofia/Linda
Implementation	Focus on investigating the projects size, tech, feasibility	Not started	10	–	Group
POC	Create proof of concept for the available technology	Not started	10	–	Jimmy/Group
Software architecture	Preliminary architecture for the project	Not started	8	–	Andrew/Jimmy
Wireframe	Set up environment for mock/prototype	Not started	3	–	Linda
Inception	Gather and send inception material to Group 0	Not started	4	–	Sofia
		Sum	62.75		
		Time since previous iteration		91.25	
		Time total in the project
