Analysis

((Describe the feeling of the system, does it feel stable/shaky, what parts are good, what needs to be worked on.))

The feeling of the system is much better than last time it was tested. All bugs are taken care of and the majority of the test cases pass. Further explanation to what needs to be worked on to get all test cases to pass is stated in the **Points of**

improvement above.

The system feels stable on:

- All the devices listed above.

The system feels shaky on:

- None of the above listed devices.
